👤 Profile

I'm creative and detail-oriented developer with a sharp eye for aesthetics. I take pride in my strong sense of responsibility, my passion for my work, and my appreciation for everything visually appealing.

💼 Work Experience

May 2025 – present

Codeus, Podgorica
Front-end developer

- Developed and maintained complex frontend modules using Vue.js and Nuxt for a large-scale mobile network coverage analytics platform.
- Implemented API integrations to deliver seamless data visualisation, location-based analysis, and real-time signal coverage mapping.
- Optimized application performance and UI responsiveness for data-heavy geospatial tools and enterprise workflows.

Aug 2024 - May 2025

Ministry of Justice, Government of Montenegro
Directorate for ICT Systems and Services

Front-end developer

Dec 2022 – Aug 2024

Codepixel, Podgorica
Front-end developer

- Developed frontend interfaces using Angular and Vue.js for an ecommerce project.
- Designed and implemented frontend for both customer-facing website and administrative panels.
- Integrated APIs to ensure smooth data exchange between frontend and backend systems.
- Created responsive designs to optimize user experience across various devices.

Jan 2022 - Nov 2022

GoldBear Technologies, Podgorica
Software developer

- Developed backend applications using Laravel, focusing on creating simple REST API endpoints.
- Implemented frontend features using Vue.js, Vuetify, and Angular.
- Participated in code reviews and maintained code quality standards.

2020 – present

Exacta Agency, Podgorica
Freelance web developer

- Managed and developed various web development projects on a per-project basis, ensuring timely delivery and high-quality standards.
- Provided continuous website maintenance and support, hosting client websites on my own servers.
